

急流すべり

FLUME RIDE

OKAMOTO MFG. CO., LTD.

急流すべり(FLUME RIDE)

スリルと涼感のダイビング！

乗物はさわやかな水流に乗って、緑や花の中に直線やカーブを描きながらゆっくり下って行きます。

ムードは一変して巻揚げ装置によって最頂部まで引揚げられ、急斜面を一気に滑り落ちる気分はまさに痛快です。

Fly down the rapids!

Your boat suddenly zig-zags like a log being tossed down a steep mountain stream. The climax of course is getting an exciting splash!

A water mill is located on the stream bank to control the stream velocity. (The water mill is one of several designs available)

仕様緒元 (SPECIFICATIONS)

走路全長(FLUME LENGTH): 350m
